Research Career

University of Milan **Milan (Italy)**
Assegnista di ricerca *2018-currently*
Currently part of the N3PDF research project. PI Stefano Forte. Financed by the European Research Council through an Advanced Grant (n 740006) within the Horizon 2020 Research & Innovation Programme

Durham University **Durham (UK)**
PhD Thesis, Supervisor: Nigel Glover *2014-2018*
Next-to-Next-to-Leading Order QCD Corrections to Higgs Boson Production in Association with two Jets in Vector Boson Fusion

University of Zurich **Zurich (Switzerland)**
Academic Secondment, supervisor: Thomas Gehrmann *Oct-Dec 2016*

IFIC (Valencia) **Valencia (Spain)**
Research Stay, Supervisor: M. Vos *2014*
Project Title: Experimental Limitations to Charge Asymmetry measurement in top quark pair production at hadron colliders

University of Valencia & IFIC **Valencia (Spain)**
Master in Advanced Physics: Theoretical Physics, 94.6% *2013-2014*
Master Thesis supervisor: German Rodrigo
Study of charge asymmetry in $t\bar{t}$ production through axigluons

National Accelerators Center (CNA Sevilla) **Seville (Spain)**
Research Stay, Supervisor: J.M. Lopez-Gutierrez *June 2013*
Project Title: Development of computing tools for the analysis of Accelerator Mass Spectrometry results at the National Accelerators Center

University of Seville **Seville (Spain)**
Degree in Physics, 82.3% *2009-2013*
Bachelor's Thesis supervisor: Antonio Moro
Application of numerical resolution of a system with coupled differential equations to Quantum Scattering Problems with Internal Degrees of Freedom

Teaching Experience

Teaching Assistant **University of Milan (Italy)**
Corso di Informatica, 36h *2020-2021 (ongoing)*

Teaching Assistant **University of Milan (Italy)**
Fisica Quantistica II, 26h *2020-2021 (ongoing)*

Teaching Assistant — **University of Milan (Italy)**
Fisica Quantistica I, 10h — *2019-2020*

Teaching Assistant — **University of Milan (Italy)**
Corso di informatica, 36h — *2019-2020*

Co-director of master Thesis — **University of Milan (Italy)**
Investigating GPU hardware for fast PDF convolutions, E. Villa — *2019*

NNPDF Code Meeting — **Cambridge (UK)**
Course on the usage of the Keras and Tensorflow libraries, 5h — *June 2019*

Co-director of bachelor Thesis — **University of Milan (Italy)**
Stability in the determination of parton distribtutions, F. Settimo — *2018-2019*

Teaching Assistant — **Durham University (UK)**
First Year experimental methods course, weekly exercises, 36 h — *2017-2018*

Conference Talks and Invited Seminars

HSF WLCG Virtual Workshop — **Virtual meeting**
PDF/Vegas-Flow — *November 2020*

Generator Infrastructure and Tools Subgroup Meeting — **CERN (Virtual meeting)**
VegasFlow and PDFFlow: accelerating Monte Carlosimulation across multiple devices (joint talk with M. Rossi) — *October 2020*

40th International Conference on High Energy Physics, ICHEP — **Prague (Virtual meeting)**
VegasFlow: accelerating Monte Carlo simulation across platforms — *August 2020*

NNPDF Collaboration meeting — **Amsterdam (The Netherlands)**
Optimizating the hyperoptimization — *February 2020*

Artificial Intelligence for Science, Industry and Society Symposium (AISIS 2019) — **Ciudad de Mexico (Mexico)**
Studying the parton content of the proton with deep learning models — *October 2019*

James Stirling Memorial Conference & PDF4LHC — **Durham (UK)**
Methodological improvements in PDF determination — *September 2019*

NNPDF Collaboration meeting — **Varenna (Italy)**
n3fit and hyperoptimization in the context of NNPDF 4.0 — *August 2019*

QCD@LHC 2019 — **Buffalo, New York (USA)**
Towards a new generation of PDFs with deep learning models — *July 2019*

NNLOJET Collaboration meeting — **Zurich (Switzerland)**
Numerical Integration with Neural Networks — *May 2019*

NNPDF Collaboration meeting — **Amsterdam (The Netherlands)**
N3PDF studies of new methodologies — *February 2019*

NNPDF Collaboration & N3PDF Kickoff Meeting — **Gargnano, Lake Garda (Italy)**
Recent developments within NNLOJET — *September 2018*

Loops and Legs in Quantum Field Theory 2018 — **St. Goar (Germany)**
NNLO corrections to VBF Higgs boson production — *May 2018*

HiggsTools Final Meeting — **Durham (UK)**
NNLO phenomenology with Antenna Subtraction — *September 2017*

Internal Seminar — **Durham (UK)**
ϕ_η^* *observable for Higgs production* — *May 2017*

Student Seminar — **Durham (UK)**
Higgs phenomenology with antenna subtraction — *February 2017*

Invited Seminar — **Valencia (Spain)**
Higgs phenomenology with antenna subtraction — *Jaunary 2017*

HiggsTools Second Annual Meeting — **Granada (Spain)**
NNLO calculations for Higgs processes — *April 2016*

Internal Seminar — **Durham (UK)**
Renormalisation Scale Dependence as a Testing Ground for NNLO calculations — *February 2016*

Student Seminar — **Durham (UK)**
Building and Playing with NNLO Monte Carlos — *February 2016*

HiggsTools First Annual Meeting — **Freiburg (Germany)**
NNLO predictions for Higgs production at LHC — *April 2015*

Complementary Education

Cisco Networking Academy — **Remote**
Introduction to Cybersecurity — *April 2020*

Xilinx Developer Forum — **The Hague (The Netherlands)**
FPGA Developers Forum — *November 2019*

ExotHiggs — **Zuoz (Switzerland)**
Summer School on Higgs and BSM Physics — *August 2016*

YETI — **Durham (UK)**
Winter School: Prospects and Challenges for LHC Run II — *January 2016*

Higgstools Summer School — **Aosta Valley (Italy)**
Summer School on Higgs Physics for Early Stage Researchers — *July 2015*

Higgstools First Young Researches Meeting — **Durham (UK)**
Teamwork, Communication and Media training — *February 2015*

Non-academic work experience

Shell (Projects & Technology Division) — **Rijswijk (The Netherlands)**
Fortran and C Developer — *2016*

Dutch division of the Seismic Applications team (managed by Rob Eppenga).
As part of the Higgstools ITN I was given the opportunity of working at Shell for several months. In Shell I worked on the SIPMAP package, a suite of programs used for oil exploration and seismic tomography. While the formal detail of the algorithms used fall under a completely different branch of physics, the computing side was actually quite close to what it is done in high energy physics research.
My task during this internship consisted on the development and manteinance of the program (the oldest pieces written in Fortran, some of the more modern features C and C++). Runs of this code are very costly and thus optimisation is key, my focus during those months was on improving some of the algorithms and streamlining the workflow of the software. I also worked on porting parts of the code to new hardware (32 bits to 64 bits and GPU accelerators).

FamilyApp **Seville (Spain)**
Frontend and Backend Developer, Python, HTML *2014*
Sole developer of both the web interface and administration backend of the service.

Participation in grants

New hardware for HEP **University of Milan (Italy)**
Linea 2A *2019-2020*
Co-Author

Management Experience

YTF (Young Theorist Forum 10) **Durham (UK)**
Member of the organising Committee *January 2018*

HiggsTools Final Meeting **Durham (UK)**
Member of the organising Committee *September 2017*

YTF (Young Theorist Forum 9) **Durham (UK)**
Member of the organising Committee *January 2017*

YTF (Young Theorist Forum 8) **Durham (UK)**
Member of the organising Committee *January 2016*

ICHEP 2014 **Valencia (Spain)**
Outreach activities *July 2014*

Awards

Highest Distinction: Bachelor's Thesis: Numerical resolution of a system with coupled differential equations: applied to Quantum Scattering Problems with Internal Degrees of Freedom

Third Prize: IV Concurso Nacional para promocion de Jovenes Escritores Cientifico-Tecnicos ACTA-CEDRO Scientific Writing

Academic Software

VegasFlow **Numerical calculations, GPU computing**
2020, github.com/N3PDF/vegasflow *j.cpc.2020.107376*
Monte Carlo integration library written in Python and based on the TensorFlow framework. It is developed with a focus on speed and efficiency, enabling researchers to perform very expensive calculation as quick and easy as possible.

Evolutionary-Keras **Machine Learning, AI, Genetic Algorithms**
2020, github.com/N3PDF/evolutionary_keras *10.5281/zenodo.3630339*
This module deals with one of the shortcoming of Keras/TensorFlow which is the absence of evolutionary optimizers, implementing several examples to be easily used with TF models.

PDFFlow **Proton physics, GPU computing**
2020, github.com/N3PDF/pdfflow *arXiv:2009.06635 [hep-ph]*
Parton distribution function interpolation library written in Python and based on the TensorFlow framework. It is developed with a focus on speed and efficiency, enabling researchers to perform very expensive calculation as quick and easy as possible.

pyHepGrid **Python, grid computing**
2016-2019, github.com/scarlehoff/pyHepGrid *10.5281/zenodo.3233861*
Core developer of the pyHepGrid tool for distributed computing. Used to run in a systematic and coherent manner resource-hungry programs typically used for HEP simulations. The development of pyHepGrid was done with the focus on NNLOJET but has since being extended successfully to also run other programs such as MCFM, Sherpa or HEJ.

Other Projects

pybliotecario **Python, social bot**
github.com/scarlehoff/pybliotecario *Currently*
Bot in python that use different remote APIs such as Facebook Messenger API or Telegram to open a communication channel between the social messagging system of choice and the server.

Open Source **Open source contributor**
github.com/scarlehoff *Currently*
I often contribute in different open source projects and am currently the mantainer of several packages in the Arch User Repository

Relevant computer skills

Programming Languages: Fortran, Python, C, C++, OpenCL, Cuda
Scriptting/Macro Languages: Bash, Latex, gnuplot
HEP Tools: Madgraph, Sherpa, root
ML Libraries: Keras, Tensorflow
Operating System: Linux, MacOS, Windows
Computing Tools: Maple, Mathematica, Matlab, Grid Computing
Technologies: Grid Computing, multiprocessing, FPGA computing, GPU computing

Languages

Spanish: Native
English: Fluent *PhD studies carried out in Durham (United Kingdom)*
Italian: Fluent *University level courses taught and students supervised in Italian*
French: Basic knowledge *6 years at high school*
Japanese: Basic knowledge *A1.2 level certified*

PhD Thesis

Title: Next-to-Next-to-Leading Order QCD Corrections to Higgs Boson Production in Association

with two Jets in Vector Boson Fusion

Supervisors: Nigel Glover (Durham U.) & Thomas Gehrmann (Zurich U.)

Abstract: In this thesis the second-order QCD corrections to electroweak production of a Higgs boson in association with two jets through vector boson fusion are considered. This calculation is fully differential in the kinematics of the Higgs boson and of the final state jets. Infrared divergences are regulated using the antenna subtraction method. We detail the implementation of the process in the parton-level Monte Carlo integrator NNLOJET and present inclusive calculations as well as differential distributions for a wide range of observables at different center-of-mass energies.
